# Klamath Falls Resource Area Planning Update

*Summer 2004*

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.

**BLM/OR/WA/PL-04/028+1792**

### **KLAMATH FALLS RESOURCE AREA PLANNING UPDATE Summer 2004**

In an attempt to reduce printing and mailing costs, Planning Updates are available on our web site: [http://www.or.blm.gov/Lakeview/Planning/Plan\\_Updates.htm](http://www.or.blm.gov/Lakeview/Planning/Plan_Updates.htm). In the future, we will be sending printed copies of planning updates only to those individuals who specifically request to receive them. Please inform us whether you wish to continue receiving printed copies or plan to review the Planning Update on the web site and want to receive an e-mail notice when each new update is available. (You may use the form on the following page.)

The primary purpose of this Planning Update is to inform you about activities on the Klamath Falls Resource Area that may be important to the public and to solicit ideas and comments from those who may be affected by multiple-use management programs and decisions. This planning update is organized to make it easy for you to find projects of most interest. Projects have been arranged into categories (i.e., Recent Decisions, New Projects, On-going Projects, and Environmental Education Activities). In addition, each of these categories is sorted by resource topics (e.g., Lands Program, Timber Management, etc.). The table provides a brief description of activities occurring within the Resource Area and gives a location for most projects. (Refer to one of three maps following the table.)

Additional information can be obtained from the contact listed in the project descriptions. If you have questions or concerns about the proposed actions, please call the Klamath Falls Resource Area and ask for the "Contact" person listed or the Resource Area Planner as soon as possible. The earlier you get involved, the more capability we have to take into account your comments and concerns when making final decisions on planned actions. Also be alert for news releases and public notices published in the Herald and News as projects reach stages for public involvement. If you want to provide comments to a specific environmental assessment, please send or deliver your written comments addressed to the Field Manager, Klamath Falls Resource Area, by the close of (or postmarked by) the last day of the comment period.

Thank you for your continued interest in BLM's management of public lands. If you have any questions on this planning update or recommendations as to how it could be improved to make it more useful to you, stop by the office or call (541) 883-6916.

Sincerely,

/s/ *Jon Raby*

Jon Raby, Manager  
Klamath Falls Resource Area

## WE NEED YOUR RESPONSE

Planning Updates, such as this one, provide one more method for the BLM to inform the public about planned activities on the Klamath Falls Resource Area. In an attempt to reduce printing and mailing costs in the future, we will be sending printed copies of planning updates only to those individuals who specifically request to receive them. Otherwise, planning updates are available on our web site:  
[http://www.or.blm.gov/Lakeview/Planning/Plan\\_Updates.htm](http://www.or.blm.gov/Lakeview/Planning/Plan_Updates.htm)

Whether you wish to continue receiving printed copies or would like to be informed by an e-mail notice when each new update is available, we need you to return this sheet with the appropriate block marked. After filling in the correct block, just fold the page in half so that the "To" address for the BLM is showing, tape the two sides together, place enough postage for letter delivery, and return to us.

**\*Note: Please let us know of your preference by August 1, 2004**

☐

**Remove me from the mailing list for the Planning Update.**

☐

**Continue to send me a printed copy of the Planning Update.**

**(Any needed correction to my mailing address is listed below)**

| <b>Rangeland Health Standards Assessments – in progress</b>   |   |                      |                           |                        |                    |              |
| These assessments compare the monitoring information collected against the five Standards for Rangeland Health and propose management changes if current grazing use is not meeting the Standards, or not making significant improvement towards meeting them. Changes are implemented through the grazing decision or agreement process. |   |                      |                           |                        |                    |              |
